

INTRODUCTION

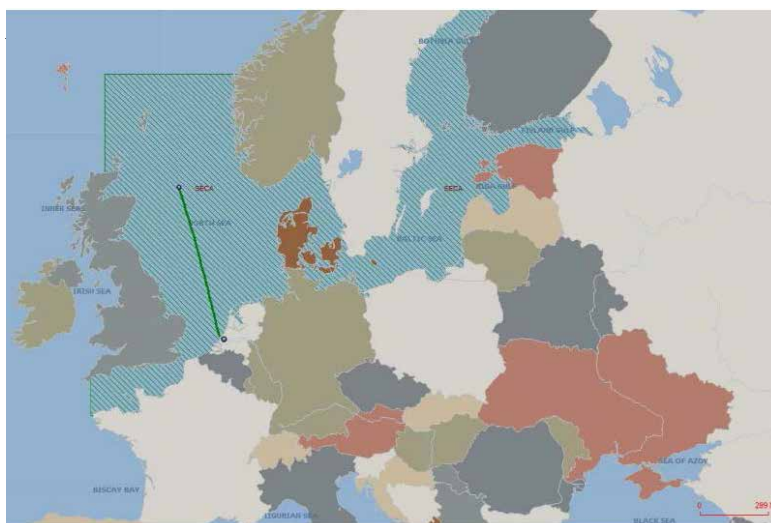

Between October and December 2007 two Fairmount tugs (Fairmount Alpine and Fairmount Glacier) towed the Sevan Hummingbird from Rotterdam to its offshore location (Chestnut Field, UK) in the North Sea with an average speed of 9 knots.

After delivering the FPSO safely to its offshore location, both tugs assisted during the mooring hook-up operation.

The FPSO Hummingbird was in 2007 the first cylindrical FPSO to be installed on the North Sea and the second one in operation. The Sevan Hummingbird was built between 2006 and 2007 by Yantai Raffles Shipyards, Singapore (hull only) and later the topsides were installed by Keppel Verolme in Rotterdam.

FEATURES

Client	Aker Marine Contractors
Location	Rotterdam to offshore Chestnut Field (UK)
Period	2007
