OCEAN MONARCH, SINGAPORE
DRY-DOCK OF SEMI-SUBMERSIBLE DRILLING RIG

BOSKALIS ENERGY SOLUTIONS

Boskalis is a leading global dredging and marine expert. With safety as our core value we provide innovative, sustainable and all-round solutions for our clients in the energy market. Realizing projects in remote locations with a heightened environmental focus is one of our specialties. Under brands such as Boskalis, Dockwise, SMIT, Fairmount, VBMS and Smit Lamnalco we offer more services than any other company in our industry, making us your next one-stop solution provider. We support the development, construction, maintenance and decommissioning of oil and gas import and export facilities, fixed and floating exploration and drilling facilities, pipelines and cables and offshore wind farms.

DRY-DOCK OF SEMI-SUBMERSIBLE DRILLING RIG OCEAN MONARCH

In 2015, the Dockwise White Marlin was called upon to dry-dock the semi-submersible drilling rig Ocean Monarch in Singapore. The Ocean Monarch was scheduled to be wet towed to a new drilling contract in Australia. Due to the highly protected ecological environment in the waters and reefs off of Australia, all marine units that are stationed to work in local waters must have their hulls cleaned to eliminate the risk of infestation from marine life that could damage this sensitive eco system. The Dockwise White Marlin was able to successfully lift the Ocean Monarch utilizing 1.2 m cribbing. The Ocean Monarch was on deck for about a week while workers cleaned the pontoons without the need for an expensive diving operation.
