## PRESS RELEASE

### Boskalis publishes 2019 Annual Report and Sustainability Report

Papendrecht, 5 March 2020

Royal Boskalis Westminster N.V. (Boskalis) has published both its [Annual Report 2019](#), which includes the new corporate business plan 2020-2022, and its [Sustainability Report 2019](#).

The new business plan is also discussed in an [online interview](#) with Peter Berdowski, CEO Boskalis.

The corporate business plan is drawn up with a clear eye on the long-term megatrends that offer both challenges and opportunities for Boskalis. These trends that shape the world in which we operate are a growing world population, growth of worldwide trade, the demand for increasingly renewable energy and climate change.

As Boskalis, we contribute through our business and our activities to society and the UN Sustainable Development Goals. We do so in the areas of flood protection, creating infrastructure for trade and energy with the associated employment this generates, and advancing the energy transition to renewables.

Our Sustainability Report includes the outcome of our updated materiality assessment which served as the basis to determine our sustainability focus areas. You can read more in the report about our approach, progress and targets, including our ambition to be climate neutral by 2050.

The reports are available as interactive PDF documents and can be downloaded via [www.boskalis.com/reports](http://www.boskalis.com/reports).

*Royal Boskalis Westminster N.V. is a leading global services provider operating in the dredging, maritime infrastructure and maritime services sectors. The company provides creative and innovative all-round solutions to infrastructural challenges in the maritime, coastal and delta regions of the world. With core activities such as coastal defense, riverbank protection and land reclamation Boskalis is able to provide adaptive and*

*mitigating solutions to combat the effects of climate change, such as extreme weather conditions and rising sea levels, as well as delivering solutions for the increasing need for space in coastal and delta regions across the world. The company facilitates the development of offshore energy infrastructure, including renewable wind energy. Boskalis is furthermore active in the construction and maintenance of ports, waterways, access channels and civil infrastructure, thus helping to facilitate trade flows and regional socio-economic development. In addition, Boskalis is a global marine salvage expert and has a number of strategic partnerships in harbor towage and terminal services (Keppel Smit Towage and Smit Lamnalco). With a versatile fleet of more than 700 vessels and floating equipment and 9,600 employees, including associates, Boskalis is creating new horizons around the world.*
