PRESS RELEASE

Boskalis awarded two offshore projects with a combined value of EUR 85 million

Papendrecht, 19 December 2019

Royal Boskalis Westminster N.V. (Boskalis) has been awarded two offshore contracts with a combined value of approximately EUR 85 million. For a new offshore windfarm in Taiwan, Boskalis will carry out the scour protection of the turbine foundations and in Denmark a four-kilometer-long gas pipeline will be installed in the seabed. The execution of both projects is scheduled to take place in 2020.

In Taiwan, Boskalis was awarded a contract for the scour protection for the Yunlin offshore windfarm. The award was made by Yunneng Wind Power Co. Ltd. Boskalis will install rock on the seabed around the 71 monopile foundations serving as scour protection. In total 325,000 tons of rock sourced from local quarries in Taiwan will be installed using a fallpipe vessel. The project is scheduled to commence early 2020 and is expected to be completed late 2020.

Boskalis also secured a contract from the Danish Energinet Gas-TSO for the laying of a new 4-kilometer-long, 36 inch gas pipeline from Jutland to Funen in the Lillebaelt of Denmark. The project includes the pre-trenching, pipe-pull, cofferdam construction and post-lay rock installation to protect the pipeline. A novelty for this project is the requirement to have a bend in the pipeline for which an innovative guiding roller system will be applied. The project involves multiple disciplines from within the Boskalis group requiring a trailing suction hopper dredger, fallpipe vessel and backhoe dredger. Visit vimeo.com/boskalis/Lillebaelt for an animation about this project.

Royal Boskalis Westminster N.V. is a leading global services provider operating in the dredging, maritime infrastructure and maritime services sectors. The company provides creative and innovative all-round solutions to infrastructural challenges in the maritime, coastal and delta regions of the world. With core activities such as coastal defense, riverbank protection and land reclamation Boskalis is able to provide adaptive and mitigating solutions to combat the effects of climate change, such as extreme weather conditions and rising sea levels, as well as delivering solutions for the increasing need for space in coastal and delta regions across the world. The company facilitates the development of offshore energy infrastructure, including renewable wind energy. Boskalis is furthermore active in the construction and maintenance of ports, waterways, access channels and civil infrastructure, thus helping to facilitate trade flows and regional socio-economic development. In addition, Boskalis is a global marine salvage expert and has a number of strategic partnerships in harbor towage and terminal services (Keppel Smit Towage and Smit Lamnalco). With a versatile fleet of more than 700 vessels and floating equipment and 10,000 employees, including associates, Boskalis is creating new horizons around the world.
