

CAPABILITY SHEET

DV HEAVY TRANSPORT VESSEL HEAVY TRANSPORT VESSEL POSITIONING & LOAD MODULE

ACCURATELY POSITION AND MONITOR FLOAT-OVER OPERATIONS

DV Heavy transport vessel is the integrated positioning and load module that is custom tuned to each Boskalis/ Dockwise heavy transport load or float-over project.

DV Heavy transport vessel integrates precise 3D positioning and vessel specific information, survey results and attitude information. All information is presented on independent graphical displays on any of the display stations on board through the unique shared data-pool concept.

The module can be interfaced with DV Vessel Traffic Management to provide have all vessel and supporting vessel information on the same real-time displays.

These real-time displays enable operators to accurately position and monitor float-over operations. All vessel positions and attitude, and HTV height are logged in readable ASCII format.

- A** DV Heavy transport vessel positioning display
- B** Dockwise HTV Black Marlin
- C** DV Heavy transport vessel mating aid display
