## PRESS RELEASE

### Boskalis awarded subsea contract by Total for redevelopment of Tyra offshore gas field

Papendrecht, 4 October 2018

Royal Boskalis Westminster N.V. (Boskalis) has been awarded the “Tyra Redevelopment Subsea Installation Phase II” contract by Total E&P Denmark. The sizable contract includes subsea engineering, procurement, fabrication and installation for the Tyra Redevelopment project in order to extend the operational lifetime of the Tyra offshore gas field by at least 25 years.

Boskalis will provide a broad range of specialist subsea contracting activities for relocating and connecting subsea pipelines as well as the installation of manifolds, vertical platform production risers and umbilicals. The project will be carried out from the Boskalis offices in Papendrecht and Aberdeen as well as in Esbjerg, Denmark prior to the project’s execution. The majority of work offshore will be executed with the high-end diving support vessel Boka Atlantis which was recently added to the Boskalis fleet.

Boskalis is very pleased with this award building on a long established and successful relationship with Total. Furthermore, in line with the Corporate Business Plan 2017-2019, this contract further strengthens Boskalis’ position in the area of subsea IRM, installation and SURF (Subsea Umbilicals, Risers & Flowlines).
