1 | 2

Royal Boskalis Westminster N.V. (Boskalis) has been awarded a contract by KSO Ciputra Yasmin to construct the land for the *Centre Point of Indonesia Project* located off the coast of Makassar. The contract value is approximately EUR 80 million. Work is scheduled to commence in the coming months and will last two years. Boskalis will deploy a mega trailing suction hopper dredger for the reclamation activities.

The project involves the construction of five artificial islands off the coast of Makassar. Approximately 75 hectares of land will be reclaimed using 9 million cubic meters of sand sourced from offshore borrow areas. The islands will be protected by rock revetments.

The construction of the five islands marks the first phase of a prestigious development by KSO Ciputra to provide high-quality waterfront land for both residential and commercial use.

Boskalis' strategy is aimed at benefitting from key macro-economic factors which drive worldwide demand in our markets: expansion of the global economy, increasing energy consumption, global population growth and the challenges presented by climate change. This land reclamation project is driven by the necessity to create land to accommodate population growth in a densely populated region.

Visit <https://vimeo.com/boskalis/makassar> for an animation about the project activities.
