

SUBSEA SERVICES

WHO WE ARE

We are Boskalis and we create new horizons for our stakeholders. As a leading global dredging contractor and marine and subsea services provider, we offer a unique combination of experts, vessels and services.

SUBSEA SERVICES

As your subsea services provider, we deliver tailored, packaged solutions utilising fully equipped diving and construction support vessels in conjunction with our in-house project management and engineering capability. We pride ourselves on our ability to offer planned and responsive support for IRM, construction and decommissioning activities.

CUSTOMER FOCUS

We work with our customers to understand and align with their drivers and challenges. A one team approach is at the heart of everything we deliver. We spend time and effort selecting the right project personnel to culturally fit and deliver on project expectations.

SAFETY

Our work goes beyond the provision of services. With safety as our core value, Boskalis has embraced safety within its culture without compromise. This is the essence of 'NINA', our No Injuries, No Accidents program. NINA rests on five values and five rules. Together they ensure that safety can be openly discussed, leading to a clear and very positive development in how safety is perceived

WE WILL DELIVER

"Our driver is to provide best value to our clients, understanding the importance of cost efficiency and maximizing operations with minimum downtime. The backbone to this is ensuring safety and the environment are at the forefront of our thinking and delivery every day. We have the right team, assets and approach to make a difference."

YOUR IRM SOLUTIONS PROVIDER

We pride ourselves on our ability to plan and execute high-quality IRM activity to subsea facilities. Whether it's targeted repairs or replacement of components, our versatile fleet enables us to respond swiftly to emergent and critical requirements. We also excel in managing long-term frame agreements; our client-focused approach ensures we build strong, long-term relationships, resulting in trust in our services.

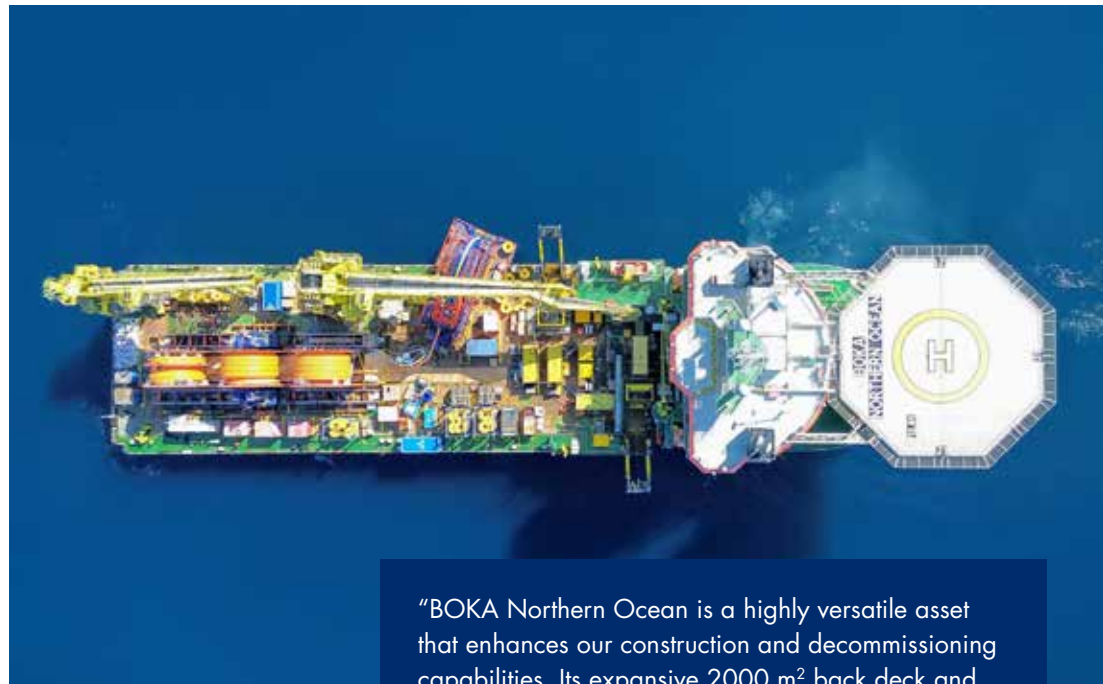

Our commitment to flexibility and reliability makes us the partner of choice for maintaining subsea operations. We understand the importance of providing safe, dependable, and enhanced solutions. By proactively addressing challenges and delivering exceptional service, we ensure that our clients can rely on us for all their subsea IRM needs.

YOUR SURF CONTRACTOR

We are fully equipped to deliver Engineering, Procurement, Installation and Commissioning (EPIC) subsea tieback solutions, leveraging our multidisciplinary engineering and project management expertise to provide safe, reliable, and high quality delivery to host facilities. Our team selects the optimal approach and manage major procurement packages, including flexibles, umbilicals, and manifolds.

With a unique range of marine services, we offer fully integrated solutions. For subsea tie-backs, we have the ability to make use of our enhanced capabilities, within the wider group, in rock dumping as well as trenching and ploughing solutions.

"BOKA Northern Ocean is a highly versatile asset that enhances our construction and decommissioning capabilities. Its expansive 2000 m² back deck and powerful 400t main crane make it ideally suited for the recovery of subsea infrastructure, as well as the installation of flexible products, providing exceptional flexibility for a wide range of offshore operations."

YOUR DECOMMISSIONING PARTNER

As a leading specialist in the subsea sector, we hold a prominent position in the North Sea market for decommissioning services. With a history spanning two decades in this market, we've amassed an unparalleled knowledge base and experience in delivering these high-profile projects.

Our offerings include full Engineering, Preparations, Removal and Disposal (EPRD) project management and execution combining diving and remote intervention solutions, flushing and disconnections, removal of redundant subsea infrastructure including pipelines, flowlines, bundles, structures, templates, and manifolds, and site remediation.

As part of a global company, we tap into the resources of our wider Offshore Energy division. This includes Offshore Heavy Lifting, offering heavy lift vessels with up to 4000te lift capability; Seabed Intervention for rock placement and seabed remediation; Marine Services for the provision of Anchor Handling Tug Supply (AHTS) vessels, and Gardline for survey services. We're your comprehensive solution provider for all decommissioning and subsea services needs.

PROJECT HIGHLIGHTS

With decades of experience, our subsea services activities have amassed an enviable global track record; we recognise the importance of engaging a trusted contractor to support operations.

EPCI CONSTRUCTION WORKS

Boka Atlantis

Scope: Subsea disconnection and reconnection of existing field, tie-in spools, SSIV, mechanical connectors. Engineering, fabrication and installation works.

Location: North Sea, Danish Sector

INSPECTION, REPAIR, MAINTENANCE

Boka Da Vinci

Scope: Provision of IRM services at multiple assets – SCM changeouts, electrical and diagnostics testing and subsequent rectifications, valve operations, jumper changeouts, general and close visual inspection and marine growth removal.

Location: UK, Central and Southern North Sea

SURF INSTALLATION

BOKA Northern Ocean

Scope: Installation of 6 Risers (2 x 12" Production, 1 x 10" Gas Export, 1 x 6" Gas injection and 2 x Dynamic Umbilicals) utilising a 400te Horizontal Lay Spread.

Location: UK Northern North Sea

SUBSEA DECOMMISSIONING

BOKA Topaz / BOKA Da Vinci

Scope: Multi-year campaign of SAT & Air Diving, and provision of daughter craft. Flushing and disconnections of multiple satellites and platforms, removal of conductions, umbilicals and numerous wellheads and offshore structures.

Location: Location: UK Southern North Sea

OUR FLEET

To support our subsea services activities we have the following Diving Support Vessels (DSVs) and Construction Support Vessels (CSVs) in our owned fleet or on long term charter.

DP2 CSV BOKA Northern Ocean

DP3 BOKA Polaris, Twin Bell Sat, Air, ROV

DP2 BOKA Atlantis Twin Bell Sat, Air, ROV

DP2 BOKA Topaz, Twin Bell Sat, Air, ROV

DP2 BOKA Da Vinci, Twin Bell Sat, Air, ROV

LET'S TALK

WHY BOSKALIS SUBSEA SERVICES?

- Industry leading, safe and quality service
- More than 40 years of experience in offshore diving projects
- Proven track record in the North Sea, Middle East, Africa and Americas
- Dedicated specialist Diving Support Vessel (DSV) fleet
- Reliable and flexible
- Responsive and collaborative approach
